EDUCATION

Silicon University

BTech in Computer Science and Engineering, CGPA: 8.88

2022–2026

Bhubaneswar, Odisha

EXPERIENCE

DataAnnotation

Prompt Engineer (Remote)

April 2024 – Present

- Argon Project: Created and tested diverse prompts for LLMs (GPT-4, Claude, Gemini) across use cases such as dialogue, search, and summarization.
- Fine-tuned model behaviour through human-in-the-loop feedback mechanisms.
- Core member of the Rating and Review team – monitored fellow taskers and assisted in precision prompt writing and dataset curation.

Babel Audio

AI Audio Trainer (Remote)

Feb 2025 – May 2025

- Recorded multilingual (Hindi English) audio samples for training ASR models.
- Worked on AI speech modulation – accents, tones, and real-world communication.
- Expert Assistant Project: Role-played various characters to guide generative models.

Data Science Intern, Syllogistek Pvt. Ltd. – Certificate

May–June 2025

- Designed and implemented a hypothyroid prediction model using ensemble techniques.
- Performed EDA, feature engineering, SMOTE balancing, and model comparison using scikit-learn, XGBoost, LightGBM, and CatBoost.

PROJECTS

Intelligent Resume Screening and Candidate Ranking System — NLP, LLMs, ML

- Built an AI-powered recruitment assistant that parses resumes, extracts skills using NLP, and ranks candidates based on job descriptions using cosine similarity and embeddings.
- Integrated GPT-based semantic matching to reduce keyword bias and improve candidate–job fit accuracy by 35%.
- Developed a recruiter dashboard with Streamlit enabling real-time filtering, scoring, and explainable AI insights.

Multilingual Conversational Chatbot for Government Services — RAG, LLMs, NLP

- Designed a Retrieval-Augmented Generation (RAG) chatbot supporting Hindi and English to answer citizen queries using domain-specific knowledge bases.
- Implemented vector search with FAISS and sentence transformers to ensure accurate contextual responses from large document datasets.
- Achieved 90% intent recognition accuracy and reduced manual support workload through automated query resolution.

SKILLS

- Programming - Python, C++, MySQL
- Generative AI
- Machine Learning & Deep Learning
- Natural Language Processing
- Data Analysis & Model Evaluation
- Prompt Engineering
- LLM Evaluation and Alignment
- Data Annotation and Curation
- Chatbot Design
- Hindi Tutoring (Native) & English Tutoring (Fluent)

ACHIEVEMENTS

- **Certificates Repository:** github.com/Amankr112/Certificates
- Completed certifications from **IIT Madrash - Joy of Computing Using Python**, **IIT Bombay - Understanding Incubation and Entrepreneurship**, **Walmart USA - Software Engineering**, **Tata Group - Gen-AI** and **Deloitte - Data Analytics**.
