

KEDARNATH PRADHAN

Bhubaneswar, Odisha, India

+91-8328830319 — kedarnathpradhanp@gmail.com — LinkedIn: Kedarnath Pradhan — GitHub: Kedar-1668

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js) and cloud deployment on Microsoft Azure. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, RESTful API development, and database design. Passionate about building scalable, secure web applications.

EDUCATION

Silicon University, Odisha, India

Bachelor of Technology (B.Tech) in Computer Science Engineering

Nov 2022 – Jun 2026

CGPA: 9.09/10

Kendriya Vidyalaya, Kandhamal, Odisha, India

Higher Secondary Education (Science)

Mar 2019 – Apr 2021

Percentage: 91.2%

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript

Frontend: React.js, React Native, HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs

Databases: MongoDB, MySQL, Oracle

Cloud & Tools: Microsoft Azure, Git, GitHub, Linux, ImageKit

Core CS: Object-Oriented Programming, Data Structures and Algorithms, DBMS, OS, Computer Networks

PROJECTS

GreenCart – Grocery Delivery Web Application

React.js, Node.js, Express.js, MongoDB

- Developed a full-stack MERN application with secure user authentication and authorization.
- Implemented product catalog, cart management, checkout workflow, and order history functionality.
- Designed RESTful APIs and structured MongoDB schemas for efficient data storage and retrieval.
- Integrated a secure payment gateway, built an admin dashboard for inventory management, and deployed the application to production on Vercel.

Car Rental Booking System

React.js, Node.js, Express.js, MongoDB, ImageKit

- Built a car rental platform with vehicle listing, search, filtering, and booking workflow.
- Implemented real-time availability tracking and role-based access for users and administrators.
- Developed secure backend services using RESTful APIs and optimized image delivery with ImageKit.
- Created an admin panel to manage cars, pricing, and bookings, and deployed the application to production on Vercel.

SIPC Website – Silicon Innovation and Promotion Cell

React.js, Lottie Animations

- Developed a responsive website showcasing members, events, and sub-clubs.
- Created reusable React components and implemented structured navigation.

INTERNSHIP EXPERIENCE

Python Developer Intern — Syllogistek Systems

- Developed a Python-based system for digitizing patient records with registration, retrieval, and updates.
- Automated file handling and improved backend data processing efficiency.

Azure Cloud Intern — Ingenious Tech World

- Deployed a full-stack application on Microsoft Azure using Virtual Machines, Virtual Networks, Load Balancer, Autoscaling, and SSL.
- Integrated frontend, backend, and database hosting for secure, scalable production deployment.

ACHIEVEMENTS

- 2nd Runner-Up, Inter-College Hackathon (Silicon University)
- 1st Place, “Escape the Room” technical event organized by GDG on Campus
