EDUCATION

Silicon University BTech in Computer Science and Engineering, CGPA: 7.82	2022–2026 Bhubaneswar, Odisha
Marwari College Intermediate (JAC), Percentage: 76.2	2019–2021 Ranchi, Jharkhand
Indumati Tibrewal Saraswati Vidya Mandir Matriculation (JAC), Percentage: 91.4	2019 Chatra, Jharkhand

EXPERIENCE

Data Science Intern , Syllogistek Pvt. Ltd. – Certificate - Designed and implemented a hypothyroid prediction model using ensemble techniques. - Performed EDA, feature engineering, SMOTE balancing, and model comparison using scikit-learn, XGBoost, LightGBM, and CatBoost.	May–June 2025
Machine Learning Intern , Silicon University – Certificate - Worked on real-world ML problems including fake news detection and maternal health risk prediction. - Built supervised models and tuned performance using Python and scikit-learn.	Aug–Sept 2023

PROJECTS

Breast Cancer Detection Using CNN <i>Python, TensorFlow, Keras, OpenCV</i> - Developed a CNN model to classify breast histopathology images as benign or malignant. - Applied data augmentation and preprocessing techniques, achieving high accuracy and F1-score.	GitHub
Thyroid Prediction Model <i>Python, scikit-learn, XGBoost, LightGBM, CatBoost, imbalanced-learn</i> - Built a predictive pipeline to classify hypothyroid cases using structured clinical data. - Included extensive EDA, feature engineering, and ensemble-based model selection with SMOTE for class balancing.	GitHub
Credit Card Fraud Detection <i>Python, scikit-learn, imbalanced-learn, XGBoost</i> - Built models like Logistic Regression, Random Forest, and XGBoost on imbalanced data using SMOTE and NearMiss. - Optimized model performance with cross-validation and ROC/PR curve evaluation for fraud identification.	GitHub

TECHNICAL SKILLS

- **Programming Languages:** C++, Python, SQL
- **Machine Learning / Deep Learning:** scikit-learn, Supervised Learning, Unsupervised Learning, Ensemble Methods, TensorFlow, Keras, CNNs
- **Data Understanding & Preparation:** EDA, Feature Engineering, Data Cleaning, Handling Missing Values
- **Modeling & Evaluation:** EDA, Cross-validation, Hyperparameter Tuning, Class Imbalance Handling (SMOTE), ROC/PR Curve Analysis, Confusion Matrix
- **Natural Language Processing (NLP):** NLTK, Text Preprocessing, Tokenization, Prompt Engineering
- **Data Visualization Analysis:** NumPy, pandas, matplotlib, seaborn, imbalanced-learn
- **Tools Platforms:** Jupyter Notebook, Google Colab, Git, GitHub, VS Code

ACHIEVEMENTS

- **Certificates Repository:** github.com/Amankr112/Certificates
- **Second Runners-Up** in Intra Collage **Smart India Hackathon Round**
- Achieved 2nd Rank at the District in Matriculation Examination
- Completed certifications from **IIT Madrash - Joy of Computing Using Python**, **IIT Bombay - Understanding Incubation and Entrepreneurship**, **Walmart USA - Software Enigneering**, **Tata Group - Gen-AI** and **Deloitte - Data Analytics**.

INTERESTS

- Playing and Watching Cricket, Drawing, Singing and Listening Music, and Geopolitics.
